### **ULD CARE's IULDUG System**

Bob Rogers September 2019

- Basis for the IULDUG system?
- What purpose does the IULDUG system serve?
- Features and Benefits
- What is the future for the IULDUG system?

Breakthrough EXCELLENCE MONTREAL

#### ULD CARE ANNUAL CONFERENCE

#### Basis for the IULDUG System

- IATA Multilateral Interline Traffic Agreements (MITA)
- The IATA Multilateral Interline Traffic Agreements (MITA) is an agreement whereby passengers and cargo use a standard traffic document (i.e. assenger ticket or air waybill) to travel on various modes of transport involved in a routing in order to reach a final destination.
- One Multilateral Agreement concluded with another airline through IATA results in joining a partnership of the growing network of over 350 participating worldwide domestic and international airlines.

**Multilateral Interline Traffic Agreements Manual (MITA)** Edition 102

	FER 1—MULTILATERAL INTERLINE TRAFFIC AGREEMENTS	
1.1	IATA Interline Traffic Agreement—Partice See	1
1.2	Interline Traffic Agreement—Cargo	12
1.3	IATA Interline Traffic Participation Agreement—Passenger (Mita One-Way)	23
1.4	IATA Intermodal Interline Traffic Agreement—Passenger	34

#### 3.2.3.7 Unit Load Devices

– A unit load device which has been transferred remains the property of its owner. The evelving airline shall return such unit load device to the transferring airline, and the transferring airline shall be entitled to a signature from the receiving airline on a receipt for such transferred unit.

# Why Interline Cargo?

- No airline can reach every destination every day of the year
- All airlines need some kinks of partnerships
- In at least some airlines interline cargo makes up 20-30% of their business

# What purpose does the IULDUG serve ?

- Every time unitized cargo is interlined the ULD goes with it
- How can the ULD asset be protected against overdue return, loss or damage?

#### The IULDUG system is the answer

7th Edition Effective 1 March 2000

International Air Transport Association Montreal — Geneva

MULTILATERAL AGREEMENT FOR THE INTERLINE HANDLING AND CONTROL OF CARRIER OWNED AIRCRAFT UNIT LOAD DEVICES

The parties hereto (hereinafter referred to as participants) operate scheduled air transportation services and desire to introduce standard procedures for the Interline handling and control of carrier owned Unit Load Devices (ULDs) to ensure the return of such ULDs to the owner carrier.

The participants whose Terms of Reference and Rules of Procedures are set out in Attachment 'A' which forms a part of this agreement are also party to the IATA Multilateral Interline Traffic Agreement — Cargo.

#### What is the IULDUG?

 It is NOT a ULD management system • It is NOT a ULD rental/supply operation THE ULD CARE IULDUG SYSTEM IS THE **GLOBAL COMMUNITY PLATFORM FOR RECORDING THE TRANSFER OF ULD'S BETWEEN MEMBERAIRLINES.** 

#### Vital Statistics

- Earliest members -1971
- Over 50 member airlines
- Around 35,000 transactions per
  - year
- Currently in its 2nd generation

Key to the IULDUG success

• Trustworthy

ANNUAL CONFERENCE

- Not for profit- community activity
- History-almost 50 years

## Challenges to IULDUG?

- Maintaining and increasing user base
- Keeping pace with technology
- Remaining financially sustainable

ANNUAL CONFERENCI

Maintaining and increasing user base

- IULDUG depends on its network of users
- More members equals a 
  more effective system.
- Interlining from a member to a non member is not as convenient as member to member

#### Financial sustainability

- Current system generates an adequate positive income and contribution to reserves
- New system will require westment
- Current transaction fees remain unchanged for many years.

# Features and Benefits of the IULDUC system

# Why be part of IULDUG?

- Its all about managing your ULD assets
  - Any interline transaction takes the ULD out of your visibility and control
  - The industry appears to loose about 3% of its fleet per year..maybe 30,000 units..how many of these are uncontrolled interlinings?
  - And how many units don't return in the 5 day grace period but only pop up a couple of weeks, months or even years later?

M M

ANNUAL CONFERENCE

## Demurrage and Non Return

- Money talks !!!!!
  - Libraries have fines for overdue
    books
  - Car owners get fines for overstaying time on a parking meter
  - Businesses get fined for late payments of bills
    - Taxes get increased if you don't pay

on time

#### **IULDUG** deliverable #1

 The owner of any ULD whose transfer has been recorded through the IULDUG system has a cast iron case to collect demurrage and non return fees from the counterparty if they choose to do so.

#### No IF's, no But's.

#### IULDUG deliverable # 2

- Transaction visibility
  - All your interline transactions on one system at your fingertips
  - Unit by unit transaction details
    - Member by member demurrage details

#### Dollars talk !!!!

The accumulated demurrage – all members- year to date 2019 is US\$ 742767.!

If we take \$ 10 a day as an average is equates to 74,276 ULD " days" or 203 ULD years of time over the 5 free days that ULD have been "away from their owner", in 8 months.

The threat of demurrage is what encourages these units back home.

# Why NOT be part of IULDUG?

- Cost? Hardly
  - Annual subscription US\$ 1050
  - Transaction fee \$ 1.50 ()
- If you consider the IULDUG system as "insurance"
  - Say 500 units transferred out a year
  - Total cost \$ 1050+ \$750=\$1800
  - Replacement value of 500 units= \$ 500,000
    - "premium" as a % of value insured: 0.36%

#### Hard to use?

- Maybe..a little..could always improve
  - System itself is easy to use, desktop, laptop, even your mobile
  - Data entry is antiquated
     Paper based UCR
     3<sup>rd</sup> parties not reliable

#### Clarifications

- ULD CARE and the IULDUG system does not process any kind of financial transactions- IULDUG data is for our members to use to collect demurrage from other members at their discretion
- The IULDUG system is not interconnected to the IATA clearing house. An incurred demurrage will not automatically be deducted from another member airline.
- ULD CARE is happy to support tech questions such as password resets but does not in general see itself as getting involved or taking sides in any kind of discussions between member airlines
  - Interlining not only applies to the transfer of built up ULD in the course of cargo shipments but can and is also used to track courtesy moves between airlines ( no demurrage in such transfers)

### What's next for IULDUG?

- Maintain and extend our membership, its in everyone's interest for IULDUG to wer the entire industry
  - All our members can help to bring in the missing pieces of the jigsaw
  - Trial memberships

 Promotional material from ULD CARE

## It's all about digital

- Increased connectivity
  - Replace the paper !!!!
    - UCR's
    - LUC's and MUC's
    - SITA messages
  - Smartphone
  - Or even "smart watch"

- Increased connectivity
